PLAYTIME

EXPLORING,  
ADVENTURE

EVERYDAY  
ACTION

*„Children learn during playtime, and they gain the ability of learning as a playful act.“*

*O. Fred Donaldson*

This is the reason why the **Bind & Bery** toy-set has been designed.

This is a toy set, which can improve the abilities of children. We wanted to create a toy, by which children can be freed out of the virtual world, and provide them a chance to experience what we experienced, the real exciting physical play-world.

This great colorful toy provides the possibility for children to improve their cognitive skills (logic, attention, memory, realization of cause and effect), graphomotor skills, sense of balance, coordination of the eyes, hands and legs, visual perception and social behaviour, while also a great chance to develop skills of working in a team.

The upbuilt houses, castles and tunnels can contribute to play tales and fictive stories, while they also provide safe and comfortable environment. The feeling of being inside of one of this „building“ is rewarding after it is assembled.

**Keep our children safe, while we develop them so they can become clever, creative valuable adults!**

1

## COTTAGE

Number of components: 11

Size:

Width - 100 cm

Length - 105 cm

Height - 115 cm

Available with 100% cotton or  
UV resistant waterproof sheet.

2

## TETRIS COTTAGE

Number of components: 33

Size:

Width - 100 cm

Length - 105 cm

Height - 115 cm

Available with 100% cotton or  
UV resistant waterproof sheet.

3

## BASTION

Number of components: 16

Size:

Width - 100 cm

Length - 105 cm

Height - 100 cm

Available with 100% cotton or  
UV resistant waterproof sheet.

4

## TETRIS BASTION

Number of components: 38

Size:

Width - 100 cm

Length - 105 cm

Height - 100 cm

Available with 100% cotton or  
UV resistant waterproof sheet.

**5**

## THE TWO BUILDINGS COMBINED

Number of components: 58

Size:

Width - 100 cm

Length - 250 cm

Height - 115 cm

Available with 100% cotton or  
UV resistant waterproof sheet.

Our skill development toys have TÜV-SÜD (KERMI) permission, its international inaugural number is w160059. Our product is made of machined furniture sponge, using two type of sheets. One of them is colorful, 100% cotton, the other one is UV resistant waterproof and colorful textile sheet. The components are attached by hook and loop fastener, which grants the stability of these buildings, so these stay in one block after they are upbuilt. To make significantly easier the cleaning process, every sheet has a hidden zip, so it can be taken off (more information in the instruction manual).

By combining more houses, bastions and tunnels, villages or more complex fortresses can be built.

Since we use soft sponge and soft textile, our toy portfolio provides safe environment for the children.

**Judit Kondics** Kindergarten headmistress

Children's attention was caught at first sight as the toy is large, colourful, consists of interesting shaped and soft-touch construction blocks. They were watching with great interest what they could build of it, they have ruined it with great pleasure and began again to rebuild.

By seeing the children, the game provided a great opportunity for co-operation, logical thinking, and common problem solving. It puts children in the joy of coexistence and the importance of teamwork. It improves their visibility, part - whole relationship, their watching, their patience and their imagination. The finished castle and house were further developed for role play, with their imagination new and new opportunities and functions were invented.

It can be recommended for any age, apparently the younger with help, while older children may be able to build it by themselves.

**Judit Halász** Kindergarten teacher, Vienna

It's colorful and the chance to break it down and rebuild it again is charming. This needs movement and mental effort. A real challenge, since children must plan, organize and cooperate. The one thing I especially like is that it is "never finished". It can be always redesigned, since there are so many possibilities to extend it or change it. It is a real "I do it for joy" toy.

**Anita Dervalics** Prep school educator

The foundation and the primary step of skill development is movement, especially creeping, climbing. The maturation of the nervous system is based on and promoted by the big movements. This all affects the ability to acquire reading and writing.

The postpositions, the knowledge of part-and-whole relation and sequence are also important for a successful school start. This great toy enables the play with great moves, playfully, and cheerfully upgrades these areas, as they can practice directions, postpositions while creeping, crawling, and when they have set up their nook, they can play role-plays.

Every child can find the joy in it!

**Nóra Takács** Kindergarten headmistress  
and special education teacher

Special pedagogical evaluation:

Most of the autistic, visual impaired and hyperactive children in our group liked to play with the house made of sponge blocks. They were absolutely excited to jump in, they enthusiastically pushed out the windows and put it back again and again. Throughout this activities they were able to develop a number of skills.

Without the necessity of completeness, I would list some areas:

- big and fine movements,
- eye-to-hand coordination,
- sense of balance,
- visual, tactile perception,
- space sensing,- body image
- cognitive areas  
(logic, attention, memory, part-whole, cause-recognition, etc.)
- ability to cooperate, social behaviour

So it would be extremely useful for our kindergartens to have such a house in these groups. Thanks for the opportunity to try!

Conductive pedagogical evaluation:

- Playful, thoughtful, moving, inventive idea.
- The castle is ideally designed.
- Safe nook, kids loved to play with it.

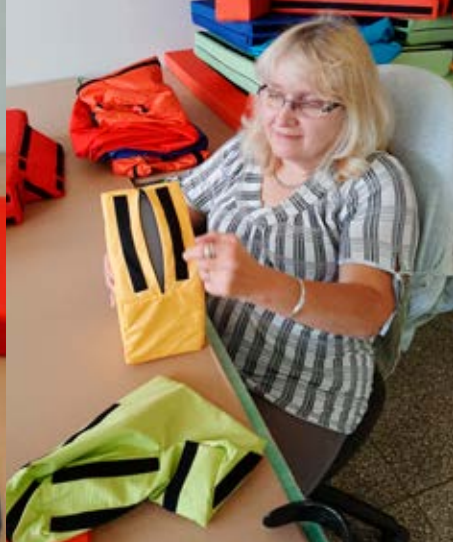

**Péter Andor** main child animator in Club Tihany

The Bind & Bery skill development toys are so useful for us animators, since it can be easily used to create amusing stories with interesting tasks.

## How they are made

Our high-quality **Bind & Bery** products are the result of the Főkefe Nonprofit Ltd., Craftsman of Public Utility Ltd. and EFRO Public Utility Nonprofit Ltd. companies' accurate and dedicated work.

# BIND & BERY

The family builds together.

Preparing for school by playing.

Every child needs a snug!
